;-

PRO x_breaker_event,ev

   WIDGET_CONTROL,
ev.id, get_uval=cmd

 </blockquote>
Yep, exactly. I assume you have control over the html codes that are generated?
<p>Brad Gom</blockquote>
Yes, I have.

It uppercases the RSI Routines too and did the formatting of
the whole syntax

and it is written totaly in IDL .
<p>Now I think you will ask if you can use it.
<p>Yes, but you have to wait a few days, because it is part of a library
which we will published I hope before Christmas.
