<HTML>
Hi all,
<BR>I'm using the david fanning's "xwindow" procedure.
<BR>I used it with the keyword "wid" to make other oeparations
<BR>on the display window.
<BR>I need to have the PS output of currently display and not
<BR>of the starting display.

<P>Has anyone just modified the procedure to do that?

<P>Thank you.
