<BLOCKQUOTE TYPE=CITE>i have the following problem.
<BR>I have two row vectors lets say A=[1,2,3] and B=[4,5,6] and I want
to
<BR>create a matrix

<P>M=[[1,2,3], $
<BR>        [4,5,6]]

<P>is there any command in IDL doing this thing.</BLOCKQUOTE>
Maybe I don't understand well the problem.but if you do
<BR>A  =[1,2,3]
<BR>B  =[4,5,6]
<BR>M = [[A], [B]]
<BR>help, M
<BR>print,M
<BR> 

<P>Is it the result you need?

<P>It is equivalent to the use of the reform:
<BR>M = [A, B]
<BR>M = reform(temporary(M), 3, 2)
<BR>
