Subject: IDL Function keys don't work

Hello,

I can't get the function keys of IDL to work. I defined them the proper way
as explained in the manual and also help,/keys shows they're defined ok.
I think it has something to do with running under Openwindows 2 because every works
fine with IDL under MS Windows and it used to work with PV-WAVE under sunview.

I'm running IDl under Openwindows 2 on a Sparc2 station.

Can anyone help me out on this?

Thanks in advance,
