We are thinking to buy several SGI O2 machines which run IRIX 6.3. I'm wondering if any of the readers here have SGI O2s and are running PV-Wave advantage. I've checked the VNI website and talked to VNI technical support and learned that VNI supports IRIX V6.2 officially but not V6.3 yet. Techsupport reports a minor gotcha installing Advantage on a V6.3 machine which is surmountable.

However, I'd feel much more secure about my pending purchase if someone could report that they are running Wave on their O2 with good results.

What say you?

Matt
