Hi

there is an other possibility for the problem,
when the float has no dot (format problem) :

```
str_chr = { str_chr, L:", F:"}  
str_chr_arr = replicate( { str_chr}, lines)
```

```
// read in as characters  
readf, fd, str_chr_arr, format = '(A15, A8)'
```

```
str = { str, L:0L, F:0.0}  
str_arr = replicate( { str}, lines)
```

```
// no needed loop !  
str_arr.L = str_chr_arr.L  
str_arr.F = str_chr_arr.F
```

Clemens
