
Subject: CMY postscript again

Hi,

I remember a posting a few weeks ago on the possibility to produce CMYB postscript output rather than RGB. That guy asked for personal replies and there wasn't any followup in this newsgroup. Now I tried to reach him/her because I'll need to send some color plots to a publisher soon, but I couldn't get through. So, if anyone has a solution to this problem, please either post it here or send me an e-mail.

Thanks,
Martin.

PS: if this is not possible in IDL 5, maybe it would be worth including in IDL 6 ???
