
Subject: Widgets Default sizing.

Hello,

Does anybody know how to make all members of a Row base widget have the same XSIZE (i.e. the largest on that base).

The keyword GRID_LAYOUT adjusts YSIZE for ROW bases and XSIZE for COLUMN ones and it's not what I want. For example:

```
wbase = WIDGET_BASE(ROW=2); /GRID_LAYOUT here will make a 512x1024
; widget because it adjusts YSIZE of wbut
wbut = WIDGET_BASE(wbase,COLUMN=2,/GRID_LAYOUT)
wbut1 = WIDGET_BUTTON(wbut,VALUE='Done')
wbut2 = WIDGET_BUTTON(wbut,VALUE='Cancel')
wdraw = WIDGET_DRAW(wbase,XSIZE=512,YSIZE=512)
WIDGET_CONTROL,wbase,/REALIZE
```

I have tried different combinations like encapsulation of a ROW base with a COLUMN base but it does not work. I don't want to use XSIZE directly because I want this feature in a more sophisticated widget tree.

Many thanks.

Cheers,
