We have 2 licenses in our dept. We were thinking of writing a data acquisition system (for Neurophysiology) in WAVE, but at these prices it's out of the question. A neurophys rig costs >\$10K, sans computer, even at that price \$2k more for the language to run the software is extreme. We are looking into other options and will probably abandon WAVE altogether. Too bad. It was a nice product, but boy are they greedy.
