 İ want created a compound widget similar to CW_PDMENU BUT with a List widget
[lovely ASCII art deleted!]
> (yes! similar to Microsoft Windows 3.1 :-) >
> Do you have idea?
Gilles,
Je viens de trouver oops, sorry folks. ;-)
I just found this in the latest IDL FAQ list, hope it helps. I don't have 3.1, so I can't speak any further on this.
{begin quote}
WHAT'S NEW IN IDL 3.1
[]
NEW USERS' LIBRARY ROUTINES
[]
NEW PULL-DOWN MENU COMPOUND WIDGET
A new Widget Library routine, CW_BSELECTOR, is a compound widget

pull-down menu who's button label shows the menu item currently selected, creating a widget similar to an MS-Windows "combo" control.

Cheers,
