Raytheon STX Corporation in Greenbelt, Maryland, has an immediate opening for a Scientific Programmer/Analyst to assist in the ingest, calibration, characterization, and analysis of Landsat 7 ETM+ data at NASA's Goddard Space Flight Center.

The successful candidate will analyze data files, develop calibration algorithms, install data products and analysis results on a web site, and maintain a data archive. Qualified candidates must have a BS/BA preferably in a science-related curriculum, and four years' experience; strong computer skills (UNIX); self motivation; and the ability to function effectively in a team. Remote sensing/image processing, strong math/statistical skills, and experience in IDL, HTML, and Oracle are desired.

To apply, please forward a resume and cover letter referencing HRD-IDL to: Raytheon STX Corporation, 7701 Greenbelt Road, 4th Floor, Greenbelt, MD 20770; or fax to 301/441-3612; or email to recruiting@stx.com (in ASCII text--no attachments, please).

Raytheon STX is an equal opportunity employer (M/F/V/D).

Visit our web site at www.stx.com for other opportunities.
