Hi, I am new to pv-wave, I am trying to grid some irregular data by using pwave GRID function. I get the following error, I have no idea how to fix it.

Can anyone who may have encountered this problem and/or knows the fix kindly email me the solution.

I will be very thankful!

sinha@ims.alaska.edu

PS: I am also interested in some public domain gridding software.

Basically I want grid x-y-value data to rectangular X-Y-VALUE data.

pvwave GRID function does not seem to do a satisfactory job, at least for me.

Error message from pwave
