Hi all -

I have a mild problem with posting the FAQ to the group. The FAQ is 80K and my news reader only allows 32K files before turning them into MIME digests. I can break the file into pieces, let it get converted to MIME, post a pointer to the location, pass it to someone else for posting to the group, etc. I'm open for suggestions.

In the meantime, here's a pointer to the latest FAQ (updated 1/23/98):
http://ww2.sd.cybernex.net/~mgs/idl_faq.html

Regards,
