Subject: pictures without borders, full screen pictures

I'm running IDL 4.x remotely on a Sun using an xterm emulator on my
Win 95 machine. IDL and my xterm emulator both agree on my screen
size (currently 800 x 600). Is it possible for me to use IDL to
display a 800 x 600 image array so that it will fill up the entire
screen, without showing any window borders etc.? When I use the
WINDOW command, the window is off center and I have the title bar
and window borders to contend with. Can I get rid of the bar and the
borders for any size image?

In other words, if I want to be able to paint the (m,n)-th pixel on my
display red, can I use IDL to do it?
