
Subject: Histogram has wrong x-axis?

I'm fairly new to IDL so I'm probably missing something obvious...

I have a big (1024x1024) array that has a minimum value of -16.1 and a maximum value of 4.1. When I PLOT, HISTOGRAM(array), the x axis ranges from 0-20, why isn't the X axis range -17 to 5?
