
Subject: HELP with systime()

Is there a way to convert a binary time value like the one
returned by

```
timeval = systime(1)
```

into a date string like

DOW MON DD HH:MM:SS YEAR ?

I've found `bin_date()` but it accepts only the `ascii_time` format
for input. I'd like to convert the number of seconds since 1/1/1970 into
the month, day, year, ... that it corresponds to.

Thanks for any help.
