Subject: PV-Wave v IDL - How do the command languages compare?
Posted by gnaa38 on Thu, 03 Jun 1993 13:21:12 GMT

How do the programming languages of PV-Wave and IDL compare?
Are they similar?
Are they based on other languages(ie C or Fortran)?
Are they easy to learn?
Which one do you prefer?
Any advice will be appreciated.
Cheers.
