Subject: IDL & Sybase Posted by goblec on Wed, 02 Jun 1993 02:10:39 GMT View Forum Message <> Reply to Message

I am looking for some IDL code that can conduct Sybase queries and return the results in IDL variables. We are running IDL on a Sun. A front end for Sybase from IDL would be nice also. Does anyone know of anyway to do this or programs that are available from the net?

Thanks
