In a previous article, [AMAZUK@dirac2.span.nasa.gov](mailto:AMAZUK@dirac2.span.nasa.gov) (Ann Mazuk) says:

> Hello,

>

> I am running IDL Version 3.0.0 using VAX/VMS 5.5. I am trying to make  
> multiple calls to CURSOR to read in data coordinates. It seems to work  
> the first time that I call CURSOR, but each call after that gives erroneous  
> results. Has any else had this problem? Is there some procedure that I  
> need to use between CURSOR calls?

>

I had the same problem. I contacted IDL (some chap by name of Allan) and he could not reproduce it on their hardware so we concluded that it must have been the interplay (or lack of it) of my GO230 terminal(TEK emulation), VAX/VMS, etc and I dropped the matter. It wasn't that important to me then.
