Greetings - I am new to the world of both IDL and pvwave
and hopefully i can get some expert advice. i am currently
working on a program where i have been given a considerable
amount of code that was written to run under IDL, but we
are having some trouble getting an IDL license; however, we
have a PVwave license. any thoughts on how painful it would
be for an absolute IDL/PVwave newbie to rewrite the IDL
code to run under PVWave?

Thanks -

Ebeth Jones
