I am trying to plot a velocity field of dimensions 61(x) by 80(y). I would like the axes to be the same scale in the ps file output. I also have x, y and major titles and labelling which seems to effect the size of the final output. I have tried something like this:

```
set_plot, 'ps'  
device, /inches, xsize = 6.1, ysize = 8
```

but I think this only deals with the printable area.

Regards

David
