Wow, this is spectacular! But done in IDL!? No how, no way.

Cheers,

David

P.S. I've known Dan for a long time and always admired both his artistic \*and\* IDL programming skills, but this seems to take both to a new level. Please, Dan, show us how you did this! It's enough to get me studying that damn Object Reference manual again to see what \*else\* I've missed. :-)
