Now, I'm not a US citizen, so I can't really "push" this design to any elected official - but I strongly urge people to take a look at the web page - the design is very good, and the images are stunning!

One great thing would be to publish the code, and maybe allow people to add a twist to it - like rotating the thing with the trackball-thing etc. And imagine creating a screensaver with one of these rotating coins floating around!! Makes me proud to be an IDL user.... :-)
