Subject: [PV-WAVE] input line to long
Posted by Franz.Dollinger on Wed, 18 Mar 1998 08:00:00 GMT

hi,

when I try to read in ascii data from files containing long lines
I get (PV-WAVE 6.10):

  % Input line is too long for input buffer of 2048 characters

  ...
Is it possible to overcome that?
How do I read in ascii data from files longer than 2048 characters

thanks

bye
 Franz
