Hello,

I am a spanish student, I am developing and aplication for a
Center in Germany and the last days I've had some strange problems. I
have my aplication compiling and running here in Spain, but when
yesterday I sent it to Germany , there it does not compile,
unbelivebable!. We both have the same development version idl 5.0.2.

I have tested the aplication in different idl licences here
in Spain, and no problems and of course the least with compiling. It
seems the thransmission has been done correctly. I have done it sveral
times etc...

Well the errors are also very courious. They only appear with to
functions, CW_BGROUP, and GET_SCREEN_SIZE , but the fuctions are in
their version,...

In a file of 4000 lines only this errors apear,
:: ::

        screen_size=GET_SCREEN_SIZE()

                        ^
% Syntax error.
  At: C:\George\Pet.pro, Line 4031

 wZWindow= CW_BGROUP(wZBase,/ROW,/EXCLUSIVE, $

                        ^
% Syntax error.
  At: C:\George\Pet.pro, Line 4084

 wRoiDefModes= CW_BGROUP(wSubBase, /COLUMN, /EXCLUSIVE, /NO_REL,
/RETURN_NAME, $

                        ^
% Syntax error.
  At: C:\George\Pet.pro, Line 4109

 wRoiDefOptions= CW_BGROUP(wSubBase, /COLUMN, /NO_RELEASE,
/RETURN_NAME, $

^
% Syntax error.
   At: C:\George\Pet.pro, Line 4111
% 4 Compilation errors in module PET.
 :: ::
::

This are the only occurrences of this functions in this file. I find it
quite strange, and above all I do not know what to do, and it is a
little bit urgent.

THANK YOU ALL ,

Maria.
