Great work guys -- I like this. It is set up as a PrintScreen macro on my version of IDL 5.0.

However, I just wanted to point out a typo:

```
window,/free,/PIXMAP,XSIZE=!d.x_size,YSIZE=!d.ysize
```

should be (y_size):

```
window,/free,/PIXMAP,XSIZE=!d.x_size,YSIZE=!d.y_size ; create a temp
```

Kelly
