
Subject: Changing time interval for double click

Hi there!

Is there a way to change the time interval that distinguishes a double click from two separate clicks? I don't think so, but maybe one of the gurus here has an idea?

For my own widgets I could work around this, but this would make things complicated, and for `dialog_pickfile` I have no solution.

This Sun has a properties dialog for this setting (using CDE or OpenWindows), but it doesn't affect IDL.

Alex
