I'm a relative neophyte to pvwave and I have a (hopefully) simple question which someone can answer. I have scoured the font sets and cannot find an angstrom symbol. I've been able to create one from existing fonts, but the result is less than perfect. Does anyone know the best (if there is one) way to put together this symbol?

Check out /idl/notes/*.doc files. One of them mentions this.
If on unix, do a "grep ngstrom *.doc" to find out...
