In a previous article, aqb5890@ACF1.NYU.EDU () says:

```
> Hi,  
> I know this is probably a FAQ, but I didn't see it in the FAQ.  
> Given an MxN array of bytes, is there some simple way to save the array  
> as a JPEG or GIF (or some other common standard) image?  
> Are there progrmas available to do this?  
> Thanks,  
> atman  
> atman@eib1.gsfc.nasa.gov or aqb5890@acfcluster.nyu.edu  
>  
DC_WRITE_TIFF
```

```
pic = bytarr(512,512)  
pic = something more stimulating than all zero's  
status = dc_write_tiff('file.tif',pic,class='bilevel',compress='pack' )  
end
```

You will need your manual to find out more about using class and compress.

Good Luck. Let me know if I can help you again.
