Hi all,
perhaps this problem has been discussed here earlier. If so, I
apologize.

We recently upgraded our Alpha machines from Digital Unix 3.2 to 4.0d.
Everything went fine, but the license mangager of IDL5 of Research
Systems Inc.

crashes (i.e. flexlm will run, but lmgrd will not). The error message
is:

19884:idl_5/bin/bin.alpha/idl_lmgrd: /sbin/loader: Error: unresolvable
symbol in
idl_5/bin/bin.alpha/idl_lmgrd:

Any help?
Thanks, Martin
