The best thing about it from my point of view (as a sysadmin) is that the 5.1 network license works fine with 5.0. This was not so going from v4 to v5 and it was a nightmare.

My only other quick-look impression is insight looks to be much faster, and may even get some use around here now ;-)
Being an all UNIX shop, we don't give a ^*(#\$%# about the ActiveX stuff.
