Whoops. Yes, TV doesn't work like that. You might try
TVImage on my web page. You will then be able to position
an image in the window with the same Position keyword
syntax that you use for a line or contour plot. For example,

    TVImage, image, Position=[0.1, 0.1, 0.45, 0.45]
    TVImage, image, Position=[0.55, 0.55, 0.9, 0.9]

You can find TVImage at this URL:

    ftp://ftp.dfanning.com/pub/dfanning/outgoing/idl_examples/tv image.pro

Cheers,

David
