Greetings,

Be the first to email me the answer to this question...
it took me over 30 minutes to figure it out... and I will
post your name as "IDL GENTLEMAN/LADY OF THE DAY".

   What is the simplest "cross-platform" method for
   obtaining the present working directory?

P.S. It is not... spawn, 'pwd', pwd & print, pwd
   but the syntax is very close to this.
