Subject: ENVI?

Hi,

I'm currently trying to write some simple user functions and custom file input routines under ENVI 2.7 on a PC (NT). I'm not sure if this is the correct newsgroup (couldn't find an ENVI one!). If so, does anyone have any experience of this type of thing? I've managed to read in some data correctly, but I haven't been able to find out how to apply specific user routines to my data.
