The problem here is when I say "go left" I mean "go right",
sometimes. :-)

To make the Z-buffer exactly like the window, you have to
set the resolution and colors *outside* the Z device. Otherwise,
you just set the resolution and colors to the defaults of
the Z device! You need something like this:

```
ncolors = !D.N_Colors - 1  
xsize = !D.X_Size  
ysize = !D.Y_Size
```

```
Set_Plot, 'Z'  
Device, Set_Resolution=[xsize, ysize], Set_Colors=ncolors  
Help, /Device
```

Cheers,

David
