Dear all,

I really like these LIVE_TOOLS, but the documentation of them is probably not complete. Or did I miss the official way to change the [xyz]axis_title?

A way to do this with LIVE_STYLE is:

```
IDL> x = findgen(10) ; only for example...
IDL> y = sin(x)
IDL> style=live_style('plot',$
  xaxis_properties={axis:'Independent Variable'
IDL> live_plot,y,independent=x,style=style
```

This works also for the yaxis:

```
IDL> style=live_style('plot',$
  yaxis_properties={axis:'Dependent Variable'})
IDL> live_plot,y,independent=x,style=style
```

(Hopefully this was not discussed before?)
