Sparcstation 2, SunOS 4.1.1, PV-Wave 3.02

Does anybody know how to force the plot routines to accept a new window size? What I need to do is:

- enter a routine which plots in a window.
- let the user resize the window with the mouse.
- loop inside the routine, re-doing the same plot in the same, resized window.

Unfortunately the second time plot is called it doesn't recognize the new window size. Any way around this?
