it returns the current compiled routines

IDL> print, routine_names()

IDL> xdemo

```
% Compiled module: XDEMO.  
% XDEMO: Entering the xdemo.  
% Compiled module: XPDMENU.  
% Compiled module: FILEPATH.  
% Compiled module: LOADCT.  
% LOADCT: Loading table RED TEMPERATURE  
% Compiled module: XMANAGER.
```

IDL> print, routines_names()

```
IDL_TOUR LOADCT MKPULL_PULLDOWN XDEMO XDEMO_EVENT XDISPLAYFILE  
XMANAGER  
XPDMENU XUNREGISTER
```
