Yes, my great boss come up this idea that lengthes of the islands I  
just  
filled in and measured of their areas are what really important.

So can anyone tell me how to measure a length of some contour?

Thank you in advance ;)

By the way, I try to run the IDL 5.1 (yes , I pay the price) and

I found that the "Insight" act so slowly on my poor PC,

133Mhz pentium , 32 Mb. window 95
