Hi people:

I've a widget base with the keyword BASE_ALIGN_CENTER set (the base is a column), and I want to put a widget base on the left of the parent base so I create it with ALIGN_LEFT but it doesn't work. There's an example code.

PRO TEST

```
main_base=WIDGET_BASE(TITLE='Test',/BASE_ALIGN_CENTER,COLUMN =1)
first_row=WIDGET_BASE(main_base,ROW=1)
left_label=WIDGET_LABEL(first_row,VALUE='Left')
center_label=WIDGET_LABEL(first_row,VALUE='Center')
right_label=WIDGET_LABEL(first_row,VALUE='Right')

first_label=WIDGET_LABEL(main_base,VALUE='Label',/ALIGN_LEFT )
second_label=WIDGET_LABEL(main_base,VALUE='Label',/ALIGN_CEN TER)
thirst_label=WIDGET_LABEL(main_base,VALUE='Label',/ALIGN_RIG HT)

WIDGET_CONTROL,main_base,/REALIZE
```

END
