Urg, I messed up the version number. The version of idl running on the alpha
is 3.6.1a not 4.3 like I stated before. Further testing shows that the idl
4.0 pickfile running on the sun works just like the idl 3.6 on alpha.

> Hi,
> I am moving some code from idl 4.3 to idl 5.0.3 and I have run into a problem
> with pickfile, or dialog_pickfile as it is now apparently called. On idl 5.0.3
> on a sun running Solaris 2.5, pickfile displays the full path to files and
