Hi everyone,

I'm very new to the group, so I'm not up on what's been discussed in the past. However, I'm working on doing some real-time work with PV-Wave. I'm curious who all out here on the group have done this kind of thing, and what they've done with it. I'm looking for some ideas,(and frankly, someone to ask questions because I'm still fairly new to wave anyway) Feel free to post, (or write, if this is such an old topic that nobody wants to see it anymore) Thanks!

Brian
