You can create multiple window 'frames' using my frame tools available
at http://cimss.ssec.wisc.edu/~gumley/frame.html
All plot parameters are saved for each frame. You can even save the
frames to a platform independent SAVE file which can then be reloaded
during a future IDL session on the same platform, or any other platform
that runs the same version of IDL.

Cheers,
Liam.

PS This reminds me of the saying "When the only tool you have is a
hammer, every problem looks like a nail".
