<HTML>

I would like to choose an unique image file format for our group of research, like HDF, Analyze, Dicom, ...

1. Store image and volume of different types (byte, long, float ...)

2. Be recognized and used in the biomedical domain

3. Command to read/write in IDL, or simple program to read/write in IDL that we can develop

4. Compatible with commercial softwares like Photoshop, ...

Is anyone has an know-how or experience with a specific file format, it will be great to help me in my choice ?

Thank you.
