Subject: Tektronix Terminals

Question:

   Is anyone out there running PV-WAVE version 3.03 and having problems using
shade_surf with Tektronix 4100 or Tektronix 4100 emulating terminals? I have
contacted PVI about this and they seem to think there might be a bug with the
driver but they are not really sure. I was just wondering if anyone else had
this problem and if they had some type solution for it.

Thanks

Allen
