Thanks to Dave Fanning and Liam Gumley for the invaluable advice in reply to my earlier postings (a diolch arbennig i Geraint H. Jones). Thanks also for writing so promptly - O.K. Dave, I'll buy your book. It seems that .JPG and .GIF are supported in IDL 4.0.1 (DOH!) (WRITE_JPEG and WRITE_GIF) , although the solution for the colour table problem in xwindows is not so straightforward. Cracking newsgroup.
