Hi!

I got a error message when I execute gs with pbmplus tool kits. to transfer ps to GIF format. It's no problem when I did the same step with the other .ps file. But one of them cause the error message which is told

"Unrecoverable error: limitcheck in .putdeviceprops"

I think it's a problem caused by my .ps file, but I don't understand the error message very well. Does anybody know??

Thank you very much!

Regards,

Yi-Chun Yeh
