
Subject: MAP_SET(IMAGE) for PS?

Hi

I've just tried to use the MAP_SET(_IMAGE, ...) routines in IDL.

It worked perfectly well on the screen, but when I tried to

re-direct the output in a PostScript file the image-origin has been placed

correct, but its size has been too large.

I've played around with the XSIZE, YSIZE-keywords of TV, but with no success.

Any suggestions ?

Thanks, Karl
