Subject: WIDGET_STUB equivalent for Windows platforms ??? Posted by Josh Stillerman on Wed, 30 Sep 1998 07:00:00 GMT View Forum Message <> Reply to Message

I have code written in C which needs to insert an event into the IDL event loop. Under unix and VMS this is easily done using WIDGET_STUBs. Anyone have a solution for NT/95? Even an unsupported/undocumented one? I need to have an asynchronous event add something to the widget event loop.

Thanks, josh
