Uh, oh. Let me check that beta test agreement and see if
I am suppose to be talking about this at all. :-(

I just let some beans spill because I think we REALLY
needed unsigned integers and I was thrilled to find
them. :-)

If I get the OK I might chat about the new GUI-builder.
There are lots of things I like about it. And a couple
of things I wish were there but aren't (yet).

Cheers,

David
